

I.T Services

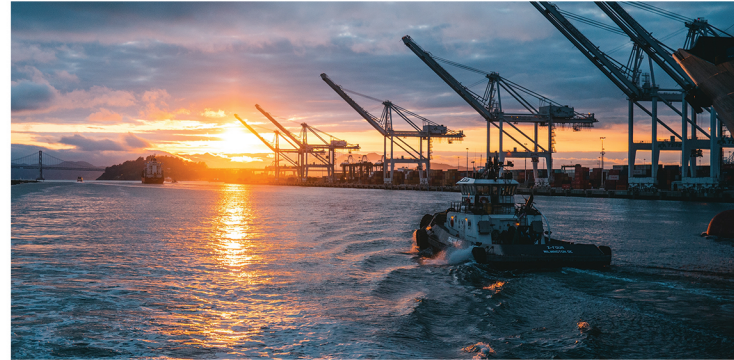

We offer our customers complete range of Hardware and Software support services. Supported by rich process experience, we can offer the solutions that are based on major platforms .The expertise lies in presenting highly personalized solutions as demanded by the customers. Our range of services are listed below:

- Digital solutions
- Website packages
- IT Hardware and Software support
- Software Installation Services

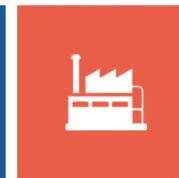

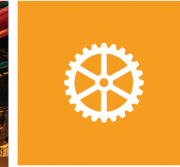

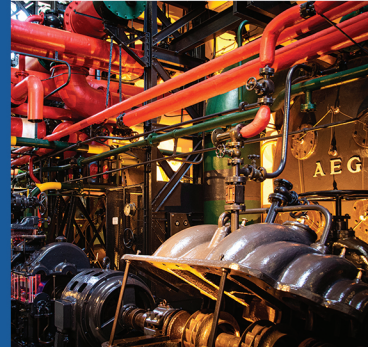

RG ENGINEERING

MARINE | INDUSTRIAL | SUPPLIES
YOUR PROFESSIONAL PARTNER

OUR BUSINESS SOLUTIONS.

As your professional partner of choice, RG marine and industrial engineering & supplies deliver engineering solutions and technology oriented services to marine and industrial sectors.

“LEADING THROUGH EXCELLENCE” IS OUR MOTTO
PERFORMANCE, THUS GAINING THE REPUTATION OF
A RELIABLE AND TRUSTWORTHY PARTNER

⌄ Marine Engineering

Ship repair | Comprehensive vessel services

RG marine Engineering offers a range of maintenance and repair services that cover your vessel from hull to engine, ensuring that it remains in Class at all times.

Specialising in on-site repairs, we can respond to emergency and breakdown situations; or can undertake planned maintenance as well as dry dock or conversion projects.

With 31-year track record in marine engineering we have developed a reputation for offering safe and reliable turnkey engineering solutions for your vessel.

With 32 years on board Dredgers, Tankers and Freezer Trawlers we have the expertise to provide turnkey solutions for:

Repair and maintenance :

Propulsion systems | Main engine systems | Controllable and fixed pitch propellers | Stern tube seals | Thrusters | Hydraulic pitch controls Steering gears | Resin chocking | Pumps | Electrical Installations Electrical Motors and Switchgears | PLC. and automations Pipe fitting | Coded welding

Auxiliary systems :

Alternators and gearboxes | Winches and windlasses Cranes and hoisting equipment

⌄ Industrial Engineering

Integrated systems and solutions

We specialise in providing a full turnkey approach to engineering services that begins with exploring the problem with our client before progressing towards detailed engineering and production to provide a customised solution.

Our team of principal level engineers and artisans ensure a general engineering proficiency that provides a personalised, professional, cost-effective service. A core group of experienced personnel is complemented with access to "on-call" contract staff to ensure that fluctuating workloads can be easily managed.

Processing plants, Automotive manufacturers, Component manufacturers, Chemical and petrochemical processors, Milling plants and the mining Industries.

With 32 years experience in various industries, we have the expertise to provide turnkey solutions for both small and large companies.

We strive to minimize machinery downtime and maximize company output.

Troubleshooting with excellent analytical abilities

Perform routine or emergency maintenance on unreliable machinery Installation and commissioning of old and new machines

Maximize machine safeties and priorities OHS compliance across all tasks

Programming of Articulated and Cartesian Robots. Programming of VSD

Modifying Machine parts with long lead time to local suppliers

Customize machine designs for specialized functions

All aspects of Hydraulic and Pneumatic work

Coded welding and pipe work, Plc. programming and upgrading New electrical installation or upgrades, Electrical COC.

⌄ Suppliers:

We are a small and flexible company capable of running big supply contracts smoothly and successfully.

Products:

Welding and Related Products | Pneumatic tools and workshop equipment | Electrical Equipment AC / DC | Valves | Hoses and Fittings | Cleaning Equipment | Gases, refrigerants and applications | Pumps and paint spraying equipment | Office / Warehouse consumables | Marine Chemicals | Environmental products | Fire, rescue and safety | Refrigeration|Medical Equipment If it is not mentioned above we will source it...
